SARL VHF/UHF/SHF: DXCC, VUCC and Distance Records Table [2024]

Updated by ZS6NK - 19 December 2024.

Please send updates to zssixnk@gmail.com. DXCC and VUCC data courtesy of ARRL (<http://www.arrl.org/dxcc-standings> and <http://www.arrl.org/vucc-standings>)

20 July 2018. The main record table now only lists the top 5 claims per Band/Mode/Propagation type. A full list of claimed ODX per ZS Call area is published below the main record table. The full [per call area] list may resemble logbook extracts from active stations but provides a more detailed record of what has been achieved from the different call areas for newcomers to target. This listing is incomplete. Please send in your ODX to be listed.

17 November 2018. All distances are calculated using the Maidenhead Grid locator system. Where 2 or more stations in the same sub-square claim a record distance, the actual Lats and Longs of all concerned will be used to calculate the exact distance.

28 September 2022: For a comprehensive listing of who worked which entity for the first time from South Africa on 6M and 2M, we refer you to the following links:

Firsts on 50 MHz: <http://zs6ez.org.za/lists/50zs1st.txt>

Firsts on 144 MHz: <http://zs6ez.org.za/lists/144zs1st.txt>
