## Sovereignty for Chagos Islands

It was announced by several different sources yesterday, that the UK handed over sovereignty of Chagos Islands to Mauritius. However, Diego Garcia (the largest island which hosts a key naval and air base used by the US and UK military base) will remain to the UK, while all other parts go to Mauritius. Looks like VQ9 will still exist, while the other parts of Chagos will become 3B.

For more details, see EURO News, under "UK hands sovereignty of Chagos Islands to Mauritius after last-minute legal delay" at <https://www.euronews.com/my-europe/2025/05/22/uk-hands-sovereignty-of-chagos-islands-to-mauritius-after-last-minute-legal-delay>

## Next Generation DXing Programme

The ARRL has published an 8-video series about the Next Generation of DXing. The seminar was held on 11 April during the 76th International DX Convention. A group of panellists with deep knowledge of the current state of the art in the DXpedition world covered everything - from financing and planning of a DXpedition to getting permits, arranging logistics, planning out equipment, managing both remote and local operators, dealing with problems and much more. The latest technology being used in DXpeditions was explained in detail. The content is available on the ARRL HQ YouTube channel <https://www.youtube.com/@ARRLHQ/playlists>.

## DX from Africa

(These count towards your All Africa Award)

Tunisia, 3V. From Les Nouvelles DX [LNDX] <http://lesnouvellesdx.fr>. The LNDX reports that after six years in Tunisia, Giovanni, IT9PZM has received his 3V8LL license and is now operating from the Island of Djerba (IOTA AF-073). He has been using an IC-7000 and a vertical quarter-wave antenna, an inverted V for the 40 m, a dipole for the 80 m, and an inverted L for the 160 m. He has been spotted this past week on 20/15/10 m SSB and 10 m CW. QSL vis LoTW.

Gabon, TR. From Les Nouvelles DX [LNDX] <http://lesnouvellesdx.fr>. Jean-Michel, F6AJA, from LNDX, reports that Roland, F8EN/TR8CR, currently in Libreville, Gabon, will be celebrating his 97th birthday and plans to return to France on 12 June. QSL via F6AJA.

Morocco, CN. Michel, F5LRL, will once again be active as CN2DX from near Kenitra (IM64), Morocco, between 25 June and 30 August. Activity will be on 40 to 6 m, including the WARC bands, using CW, SSB and digital. He suggests looking for him mainly during the early morning (05:00 – 10:00 UTC) and evening hours (18:00 – 22:00 UTC). He is using an ICOM IC-7610 into the following antennas: Quad 2 elements (5 bands), verticals for 40 m, dipoles for 80/40 m and a Quad 2 elements for 6

m. QSL via F5LRL, direct or by the Bureau.

Morocco, CN. André, HB9HLM, will be active as CN2NE from Casablanca (WW Loc. IM63DM), Morocco, between 15 and 22 July with holiday style activity on 40 to 10 m and 6 m, with a TX IC7410 and IC7000 with 100 W into a dipole and 3 element beam for 6 m. He states, "For QSL, only E-QSL and QRZ.com are currently planned. I don't plan on printing any QSL; I'll see if that's necessary at the end of the activity."

## African Islands

Madagascar, 5R. Gianpi, IK1TTD, will be active as 5R8TD from two different locations in Madagascar between 27 May and 11 June. Activity will be holiday style on various HF bands using an IC-706 MKIIG into a vertical and End-Fed antennas. The locations mentioned are 27 May to 4 June - Nosy Be Island (AF-057) and 4 to 11 June - Tsarabanjina Island (AF-057). QSL via IK1TTD, direct, by the Bureau or ClubLog's OQRS. For more details, see <https://www.ik1ttd.it/2025/05/a-new-iota-adventure-from-af057.html>

Update/Note from Gianpi - I had the intention to go in Madagascar (AF-057) already a couple of years ago, but the Resort we would go to, me and my wife, was not available for the period requested... So, we were forced to move forward this destination and we want to another far away destination... see here where... <http://www.ik1ttd.it/2022/11/dx-holiday-from-8q7td.html>.

Anyway, this year we will be definitely in Madagascar!! As usual will be not a real DXpedition... I always travel with my beloved wife, so I will not dedicate my whole time to the radio.... anyway, will try to have some funny pile up from the fantastic Island!

The request of the Call and the permission to operate from the Country has been at the end quite a smooth process, also if take a lot of time because the amount request was never enough; the Bank is taking quite a high commission, so for 2 times I added money, and the fund wired came as expected! At the end I received the long-awaited call sign; as is possible choose the Callsign, as per my other operation I requested the suffix TD as are the last two call of my Italian callsign.... so, I will be 5R8TD!

We will visit 2 Islands, the first will be Nosy Be, very well know from the Amateur Radio Community; the second one will be the fantastic Tsarabanjina Island. it is quite a new island for the Touristic Industry but is much less "used" then Nosy Be... the original plan was to stay 2 weeks here, but also booking in January, we got the possibility to make just one week. Plus, my friend Claudio IW1QLH will give me the possibility to have the log on line in real time (if the Wi-Fi will assist me) ... You will find the operation here... <https://www.qsohunter.net/en/Index/353>

So be ready for my signal! I will have with me my Radio Bag, faithful Companion of many adventures around the World ... here you can see the new update version of the mobile shack <http://www.ik1ttd.it/2021/12/the-radiobag-edition-2025-edition.html>.

As usual I will be happy to receive your QSL's and reply in different mode. I will offer - direct to PO Box 140 – 18018 Taggia (IM) Italy and/or Clublog. I hope to see you down the log! 5R8TD Live Operation Here <https://www.ik1ttd.it/2025/05/5r8td-live-from-eu-057.html>

Mozambique, C9. In July, members of the Russian DXpedition Team will attempt to operate from two IOTA groups in Mozambique. They are unable to make any promises at this time as the project is quite challenging and risky, and its success will depend on several variables, including road conditions and the availability of local assistance. The approximate schedule is as follows – 5 to 11 July - C94RRC from Inhacamba Island (AF-103) and 13 to 19 July - C93RRC from Chiloane Island (AF-098). Hopefully, they will be able to run at least two high-power stations 24/7 on 40 to 6 metres CW, SSB and digital. QSLs via Club Log's OQRS. See <https://dexpedition.wixsite.com/mozambique2025> for more information.

For the record, AF-098 was only activated once (C93DY, July/August 2005), whereas AF-103 was activated twice (C94KF, August 2006 and C91VB/4, December 2006).
