The SARL Wednesday 80 m Club Contest

On Wednesday 20 May, the SARL celebrates its 101st birthday and you can participate in the second leg of the SARL Wednesday 80 m Club Contest. The contest runs from 17:00 to 18:00 UTC with RTTY, CW and SSB activity. The exchange is your name, your Club call sign (if you belong to a Club) and your 4-character grid square (e.g. KG60). Get the rules in the 2026 SARL Contest Manual or on the Contest page of mysarl.

SteppIR Communications is serving the amateur radio market once again.

According to their website, their Urban Beam, BigIR and SmallIR verticals and three- and four-element Yagi antennas are available for online purchase. Their DB-series products are available but must be scheduled to fit within the production schedule of their commercial operations. CEO John Mertel said in a recent Groups.IO post, "We never left amateur radio because we wanted to, we did it because what we had been successful at for many years in the amateur market was not working any longer and we were trying to be too many things to too many people and taking a lot of (deserved) heat in the process from our amateur customers. We knew for certain that something had to change and while we did not know how this was all going to turn out, we always were hoping for some kind of rekindling of the amateur radio consumer market. Now a year later, here we are; we have a stable, growing commercial business platform, key commercial partnerships and we feel we can responsibly

start going back to our original roots — our amateur radio customers. We are still not a perfect company by any means, for example we have got work to do on making the user experience a better one — albeit through more modern means of communication and support.” I spoke with John recently, “Though we are not exhibiting at the Hamvention, we have donated an UrbanBeam to the grand prize pool. You can find our products online at our website, along with parts for all our products.”

Word to the Wise

Sunday Driver - “Casual contest participants who appear late in the contest (usually Sunday afternoon) to make a few contacts.” You might have to talk them through the exchange, but you will (maybe) get a contact.

Fused Deposition Modelling

Fused Deposition Modelling (FDM), aka 3D printing, in its most popular form takes spools of filament material and extrudes it under computer control into complex shapes. It’s been around for a while now and has continued to improve in reliability, applicability and capability over what was available a decade or two ago when there was more hype and less “there” there. Today, you can find filament material composed of a wide range of plastics to address strength or flexibility needs. Some have various additives like [carbon](#) and [glass fibres](#) for enhanced strength. Some filaments [glows in the dark](#); some filament [dissolves in water](#). There’s even filament to [print your own soap](#). Software for modelling and printing has improved as well. Online sites provide vast libraries of user-contributed designs for download and print and there are specialty sites to generate models on the fly. Answer a few questions and you’re downloading a model you can print or bring into a CAD package (also online) for modification.

DX from Africa

(These count towards your All Africa Award)

Mozambique, C9. Bill, ZS6ACY, has returned to the bands as C91CCY and can be found on 80, 40 (4-element monobander), 20 m during his morning hours (04 - 05). QSL via N200.

Namibia, V5. Eric, N7XOB will be active as V5/N7XOB while visiting Namibia from 20 May to 19 June. He will operate SSB on +/- 7 165 and 14 265 kHz from various locations. QSL via LoTW.

Uganda 5X. Alan, G3XAQ, is once again active as 5X1XA from Bwerenga, Uganda. His length of stay is unknown. Activity has been on 20, 17, 15 and 12 m using CW and digital modes. QSL via G3SWH direct (no Bureau) and LoTW.

Rwanda, 9X. Alain "Al", F8FUA, posted the following on QRZ.com, “Hi, I will be 9X5KM from 4 to 13 June. 9X5KM is a “solo & holiday style” expedition with CW, SSB and digital activity. I will try to be active on low bands (depending on local situation) with an Elecraft K3s (100 W), Hexbeam, Dipoles, Verticals. The log uploaded on ClubLog (if access to Internet). QSL information: Direct to my Home call: F8FUA, with 3GS + SAE. I have no sponsor, no QSL manager so 3GS is a minimum to get a direct QSL. Buro (free) via F8FUA. LOTW (free) when back home. NO: eQSL, digital QSL (sorry!). No time for Website. Please apply the DX code of conduct (clear pile up means more QSOs in the log). Hope to meet you on the air.”

African Islands

(These unfortunately do not count towards your All Africa Award)

Cape Verde, D4. Ger, EC1A, posted the following. After considering several holiday destinations this year, including Cyprus (5B), Portugal (CT) and Cape Verde (D4) — I finally decided on the latter. After analysing different accommodation options, I chose a penthouse in Praia, the capital of Santiago Island. The location offers excellent conditions for installing antennas, provided I have the owner's approval. With the destination confirmed, the next step was obtaining the license. After contacting the Cape Verde telecommunications regulator (ARME) and thanks to the invaluable help of my friend Pier Paolo (D44PM), I was officially granted the call sign D44EC on 15 May. The activity will take

place between 17 and 24 June from Praia (locator HK84), although if the opportunity arises during my stay, I will try to travel to Fogo Island to activate locators HK75 and HK74. I hope propagation is good and that I can hear you all on the bands. All the best. More information at www.ec1a.es/d44ec
